

Designation: F 2208 – 02
Standard Specification for
Pool Alarms¹

This standard is issued under the fixed designation F 2208; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ϵ) indicates an editorial change since the last revision or reapproval.

INTRODUCTION

According to CPSC data, each year, on average, 350 children under five years of age drown in swimming pools, with most deaths occurring in residential settings. Also, each year, on average, 2600 children under five years of age are treated in hospital emergency rooms for near drowning incidents in swimming pools. About 42 % of the incidents require hospitalization of the child. About 79 % of the near drowning incidents occur in a residential setting. These numbers have remained relatively unchanged for the past several years.

1. Scope movement at the perimeter of or above the water surface.
